

SOFTWARE REQUIREMENTS SPECIFICATION

General

- SRS-1 Does the SRS conform to *CxCheck_CxOneArtifact*?
- SRS-2 Does the SRS conform to *CxCheck_Requirements*?
- SRS-3 Is the SRS based on *CxTemp_SoftwareRequirementsSpecification*?

Content

- SRS-4 Is every stated requirement externally perceivable by users, operators or other external systems?
- SRS-5 Does the SRS specify what functions are to be performed on what data to produce what results at what location for whom?
- SRS-6 Does the SRS describe every input into the software, every output from the software, and every function performed by the software in response to an input or in support of an output?
- SRS-7 Do sufficient background details (user characteristics, external and internal interfaces, etc.) exist to put the requirements in context?
- SRS-8 If appropriate, is metadata (priority, owner, target release, etc.) included and described?
